# CULT STATUS

DESIGNED BY CHRISTOPHER KING

## Handwritten All-Caps With A Pop Culture Flair

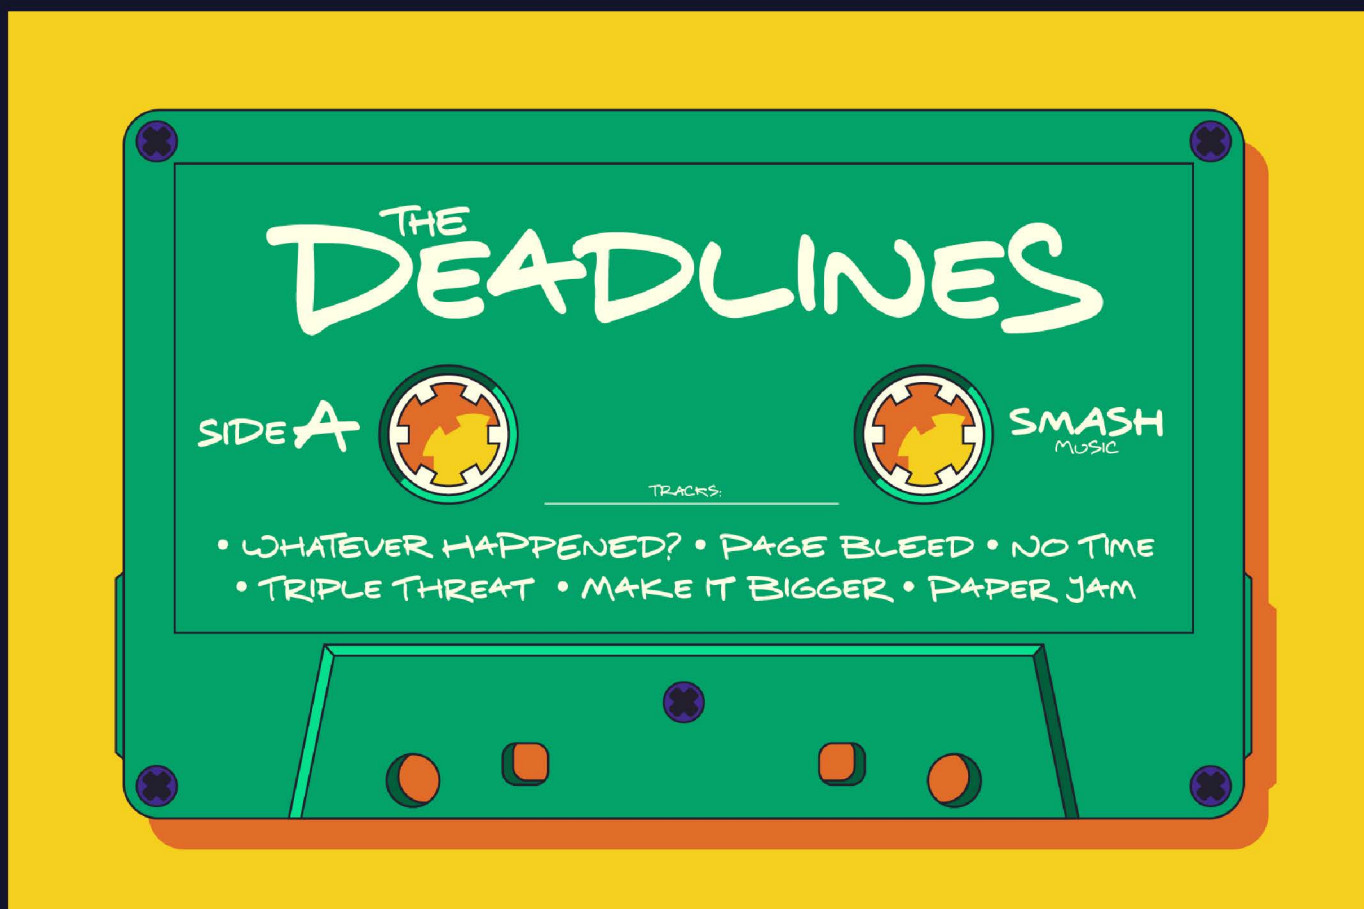

Cult Status is a versatile handwriting font based on a selection of real marker pens, offering three unique weights and an authentic, analogue flair.

Inspired by a broad spectrum of popular culture, this font has a personality that's equally at home in comic books or album covers, music videos, animations and movie titles. Its obvious links to comic book lettering inspired the all-caps design, bringing a looser, freehand flow reminiscent of home-made mix-tapes, or quick messages scribbled on a Post-it note. It's the perfect choice for adding the human touch to your work in an all-digital age.

Cult Status is an all-caps font with unique uppercase and lowercase characters, numerals, and multilingual support, along with light, regular and bold weights. It's worth noting that each weight was written separately, giving them an individual appearance informed by the pen that drew them. They're designed to complement each other and provide a truly analogue look. In addition, each weight comes with complete alternative alphabets and numerals, plus switchable Open Type ligatures for the 'oo's and tt's, to further enhance the look.
